THE INTRODUCTION.

KING *GEORGE* the Second fills his Father's Throne
 And to his Sire's Desert adds all his own :
 He's Crown'd, the Sacred Robes his Shoulders grace
 And Rays divine diffuse around his Face.
 Ye *Driades*, who treasure up the Spring,
 Ye *Naiades*, who honour *Ocean's* King,
 Ye *Nymphs*, so soft to Sense, so dear to Sight,
 Ye *Swains*, who in these lovely Nymphs delight,
 Honour that happy Day, on which was Crown'd
GEORGE the Just, the Valiant and Renown'd :
 Now *Britain's* Crown adorn so good a King,
 Justice and Truth arise and clap the Wing.
 Ye Powers divine, salute that glorious Day,
 Perfume the Air, let Flowers adorn the Way ;
 Let some the Pipe, and some the Song employ,
 Hear it ye Earth, ye Seas repeat the Joy ;
 To Realms remote, extensive as your Bound,
 Where Heaven is glorify'd, or *GEORGE* Renown'd
 A Prince ! the Pleasure of the publick Voice,
 Mankind's Delight, and Heaven's auspicious Choice
 He with Looks of Cordial Love his People greets,
 And from his Tongue flow more than *Hybla* Sweets :
 Nations in Chains, and Realms distress'd appeal,
 Let all rejoyce, for all his Influence feel.
 Religion and the Laws confirm'd his Care,
 Ye Tyrants tremble, and ye Traitors fear.
 Long live the King, the joyful Nation cries,
 And Bells and Cannons throw it to the Skies.

Great is the Name of King, and full of Splendor,
 Great, Good and Just is our great Faith's Defender :
 May he live long, his Enemies to quell,
 And honour those who have deserved well.
 As Age comes on, Lord, let his Joys encrease,
 And keep us all continually in Peace :
 So having long his Earthly Crown enjoy'd,
 And by his loving Subjects been obey'd,
 Let him at length enjoy a Heavenly Crown,
 Where Saints and Angels sit in high Renown.

Full Moon 2 Day at 9 at night.

We are now under powerful Influences; the particular Effects of which, Time only can make manifest.

Last Quarter 9 Day at 6 at night.

Many grave and serious Consultations are now on foot both at Home and Abroad of great and weighty Matters.

New Moon 16 day at 9 at night.

Very welcome and pleasing Intelligences come from several Parts beyond Sea The Merchants advance by happy Returns.

First Quarter 24 day, midnight.

Now some turbulent and male-contented Persons meet with their deserved Reward.

Moore March hath xxxi Days.

Such Fate has *Walpole* in these envious Days,
 Whose early Virtue gave him early Praise;
 Who from his Country's Service never swerves,
 And only wears the Honours he deserves:
 Receives the Profits to his Service due,
 Which even Country Gentlemen pursue.

Last Quart. 11 day at 2 in mo.

Vengeance is preparing for the Perfidious, and those that are guilty of Treasons, Destructions will soon overtake.

New Moon 18 day at 2 Aftern.

Now are there more than ordinary Matters upon the Stage of the World, and many are the Debates and Consultations of these present Times.

First Quart. 26 day at 6 Aftern.

A foreign Kingdom labours under great Difficulties.

Moore. April hath xxx Days.

In former Times, when *Toryism* prevail'd,
 And Places were to *Jacobites* retail'd ;
 When haughty Church-men flung off the Disguise,
 And seem'd most jesuitically wile ;
 Boasted a Popish Revolution nigh,
 And Protestants did openly defy.

June hath xxx Days.

Thus try'd those Men to violate the Law,
The memorable Work of wise *Nassau*;
When Heaven, mindful of the Hero's Fame,
In Royal *GEORGE* compleated *William's* Aim:
Their wisest Chiefs indeed their Errors mourn'd,
And former Hatred to Obedience turn'd.

 Fir'd with the Glories of a *Brunswick's* Reign.
 So chilling Frosts dissolve into a Heat,
 Soon as the Sun's great Influence they meet.
 Now Men, like *Walpole*, grew again rever'd,
 And *Tory* Craftsmen were no longer fear'd.

Virtue, like his, receiv'd its just Reward,
And gain'd his King's particular Regard.
Thus Merit got him Honours, Honours Foes,
Who daily vex the World's and his Repose:
But yet such mean Attempts can ne'er defeat
The good Endeavours of the Wise and Great.

Astrological Observations.

Several Persons appear very active, and a great Person is suddenly mortified.

Last Quarter 5 day at 4 after.

Great are the Expectations of the People; and many worthy Patriots are busied in using their best Endeavours to heal up all former Wranglings.

New Moon 13 day at 2 after.

Some seemingly fair, yet in the End they will prove very fraudulent Debates, which are now carried on.

First Quarter 20 day at 1 after.

Much Fraud and Subtilty amongst the vulgar Sort, which may now enter upon some rash and unadvised Attempts.

Full Moon 27 day at 1 after.

September hath xxx Days.

Tho' base Detraction, *England's* darling Vice,
Maliciously pursues the great Man's Rise:
So when Great *Marlb'rough*, for successive Years,
Had brought home Trophies of victorious Wars,
Honours and Manors justly were decreed,
In Recompence of such a glorious Deed.

Astrological Observations.

London burnt by Papists, 1666.

Last Quarter 4 day at 11 mo.

Some of these fiery, cholerick
Spirits, which of late appeared
amongst us, are now somewhat
allayed, and are not so violent
now as in some former Months.

New Moon 12 day at 1 mo.

Great are the Consultations and
Counsels about this Time, and
managed to very good purpose.

First Quart. 18 day at 8 at ni.

We hear from abroad of many
and great Dissensions that arise
among Princes. *Muscovy, Poland,*
and some other *Northern Powers*
very uneasy.

Full Moon 26 day at 3 morn.

Spain, Portugal, and some Parts
of *Italy* in great Consternation.

October hath xxxi Days.

While some uneasy at his Greatness grew,
His Posts and Profits in their sordid View,
And with their false Suggestions and Debate,
Unjustly fought the God-like Hero's Fate:
Their Arts prevail'd, great *Marlb'rough* was displac'd,
And *England*, with its General, disgrac'd.

Astrological Observations.

Last Quarter 4 day at 6 morn

Great Endeavours are now on foot in divers Places, tending to the reconciling of national Differences : May they succeed.

New Moon 11 day at 11 bef. no

Some peaceable Negotiations are yet forwarded, and at present People seem inclined to Moderation.

First Quarter 18 day at 3 mo

The good Disposition of publick Affairs which lately appeared, are now somewhat ruffled, and some new Difficulties are about this time started.

Full Moon 25 day at 7 at ni.

The 30th day of this Month, 1683. was born the most Illustrious GEORGE the Ild, King of Great Britain, &c.

November hath xxx Days.

What was the Cause that gave the World alarm?
 Or why did *Muscovites* and *Spaniards* arm?
 Why did the Imperial Monarch draw his Sword,
 In Violation of his solemn Word?
 Or whence did we perceive a War's Approach,
 But that on *English* Freedom they'd encroach?

Astrological Observations.

Last Quarter 2 day at 11 night

The Brave & Honest K. W. born.
A Time of much Business and
great Councils, and those of va-
rious Concernments.

New Moon 9 day at 10 night

Now Matters very weighty
and considerable are controvert-
ed by the wisest Persons in some
of the grand Nations of Europe.

First Quarter 16 day at 2 aft

Some former Controversies
draw near a Conclusion, and o-
thers break off with great Dif-
ficult, which may produce Mis-
chiefs hereafter.

Full Moon 24 day at 2 aftern.

Some remarkable Occurrences
now happen amongst us, and the
Minds of the People are big
with Expectation.

December hath xxxi days.

Nor can their Threats give warlike *Brunswick* Awe,
Inur'd to Battels with the Great *Nassau* :
Like him resolv'd to save the *British* State,
From Popery and superstitious Hare.
May gracious Heaven the glorious Cause defend,
And Treasons in the Traitor's Ruin end.

If you would know the Interest of One Hundred Pounds for a
Month, two Months, three Months, six Months, nine Months, or
Year; look for 100 l. in the Side, and in the next Column under
Month is Eight Shillings and Four Pence; for 2 Months 16 s. 8 d.
3 Months 24 s. for 6 Months 50 s. for 9 Months 75 s. 10 d.
and for a Year Five Pounds; and so of the rest.

*This is the honest way by which Men should
To Interest let their Silver and their Gold.
Yet worldly Misers, when to raking fall,
They, with their Interest, get the Devil and all.*

Short Discourse concerning the Moveable-Feasts, and the Reasons given why many of the Sundays near those Feasts are called by these Names.

Moveable Feasts are those Festivals, which though they are celebrated on the same day of the Week, have no fixed Seat in the Kalendar, but in several Years happen on several Days of the Month; of which kind besides Easter and Whitsuntide, &c. are all the Lord's-days in the Year, whereof many being called by particular strange Names in many Almanacks, I shall here take leave to explain them in Order, since there is not one of a Thousand understands the Reason thereof. To begin with the Year: If there be any Sunday between the Circumcision of our Lord, called New-years-day, and Twelfth-day, called Epiphany [from the appearance of the Star to the wise Men] such Sunday has no Name assigned to it, but the Sundays following Epiphany are noted in order, as the 1st, 2d, &c. after Epiphany, and they are sometimes more and sometimes fewer: as Easter falls high or low, and they must be ended and give place to Sepruagesima, which is always the 5th Sunday before Easter, (and is so called as being 50 days before it, and observed in Memorial of the 70 Years the Children of Israel were in Servitude under the Babylonians.) The next Sunday is called Sexagesima, and is 8 Weeks before Easter; the next is Shrove-Sunday, called Quinquagesima, and so Dominica Bacchanalorum, because then and the two following days many Christians shew themselves as mad as the Drunkards and drunken worshippers of Baccus amongst the Heathens; 'tis also called *Esto Mihi*, from the 30th Psalm ver. 3. The Wednesday in this Week is *Dies Cinerum* or *Ash Wednesday*, being the beginning of Lent; on which day the Papists sprinkle Ashes on their Heads. The leud and frantick Reveling the day before (viz. *Shrove-Tuesday*) and the sprinkling of Ashes on this day, gave occasion to a Turkish Envoy at Venice to relate that the Christians had a sort of Ashes, which strown upon their Heads presently cures Madnes, for, says he, the People that lay go up and down the Streets, in all appearance stark mad, the next day by a few Ashes cast on their Heads were suddenly cured and restored to their Wits again. The next Sunday in Lent is Quadragesima, or the first Sunday in Lent, (Lent is

So called from the Saxon word *Lent*, signifying the Spring which it is always kept.) This Sunday is also called *Invocavit* from the 91st Psalm, ver. 15. *Invocabit me & ego exaudiam.* He shall call upon me, and I will hear him. The second Sunday in Lent is called *Reminiscere*, from the 25th Psalm, ver. 6. member, O Lord, thy tender Mercies, &c. The third *Oculi*, from the 15th Verse of the same Psalm, *Oculi mei semper ad Dominum.* Mine Eyes are ever towards the Lord. The fourth *Lætare*, from *Isai.* 66. 10. *Lætare cum Jerusalem;* Rejoyce then with Jerusalem. Some call it *Dominica de Rosa*, because the Pope then holds a golden Rose in his Hand; others call it *Dominica de Passione* from the Miracle of the five Loaves in the Gospel: with which it is generally termed *Midlent-Sunday*. The fifth Sunday in Lent is called *Judica*, from Psalm 53. 1. *Judge me, O God, & plead my Cause.* The next is *Palm-Sunday*, so called from the Palm Branches, which the People strewed before our Saviour entering Jerusalem; 'tis likewise called *Dominica Magna*, for the great and ineffable Good wrought in the Week following for the Faithful, for the next Friday is *Good-Friday*, whereon our blessed Saviour suffered for the Sins of Mankind. Then comes *Easter-Sunday*, celebrated in Memory of our Saviour's Resurrection, which is the Foundation and Rule for all the moving Feasts. After this follows the *Quinquagesima*, or Space of 40 days between *Easter* and *Whitsuntide*: All which the ancient Christians kept as a Festival, containing six Sundays; the first *Quintodecimo Geniti*, from that of *Peter* 2. 2. This Sunday is also called *Dominica in Albis*, because those that were baptized at *Easter* used to go in white Garments all the Week, which this Night they left off. The second after *Easter* is called *Misericordia*, from Psalm 32. 5. The third *Jubilate*, from Psalm 65. 1. The fourth *Cantate*, from Psalm 97. 1. The fifth *Veneremus*, from the Introit that day beginning. The sixth is also called *Rogation-Sunday*, and the Week following *Rogation Week*, because they then made their Processions into the Field, said the Litany, and made their Prayers and Requests (or *Requies*) to God publicly. The Thursday in this Week is *Ascension Thursday*, kept in Memory of our Saviour's Ascension into Heaven. The last is called *Exaudi*, from that of Psalm 27. 1. O Lord, my Voice. Then succeeds the grand Feast, called *Whitsuntide*, (because People appeared in such colour'd Garments as the Dove's feathers, which is the colour of the Holy Spirit.)

Of the Sun, its Nature and Substance.

WITH *Anaxagoras, Democratus, &c.* of Old, and with *Kepler, Scheinerus, Bullialdus, Kercher, Riccolus*, and others of late; it cannot with fairer probability be conjectured to be other than a formal Fiery Body, consisting of true and proper Elementary Fire, partly Liquid, partly Solid; the Liquid being an Ocean of Light, and moving with fiery Billows, and flaming Ebullitions, as hath been by the abovesaid Authors observed by help of large Telescopes. The solid Part being like Land in this our terraqueous Globe, divided into Continents, Islands, Mountains, Rocks, &c. that thereby the vehement Motion of the solar Ocean might be restrained, repelled, dissipated and broken, to the end it might more effectually communicate its Panspormatick Virtue to all those Bodies to which it affords Light and Influence. It is also probable, that the solid Parts of the Sun, within which the Fluid is contained like a Furnace, are thoroughly ignified in the same manner as Bricks in the Roof and Sides of a Furnace are made red hot, and look of the same Colour with the fiery Mass of melted Matter within them.

The *Macula Solares*, or Spots, are certain cloudy Obscures appearing upon the Disk of the Sun, supposed to be a continuous obscure Matter or Vapour, sometimes closely compacted into one, sometimes dissipated into several Places, issuing from its fervent fiery Body, by force of its extream Heat. Whether these *Maculae* be in the Sun it self, or distant from it, is certainly determined; yet if you consider their first Appearance or Birth, their Disappearance or Decay, their Shape, Figure, Increase, Diminution, Separation, Conjunction, and other like Accidents, it is very propable they are part of the very Body of the Sun.

The Shapes and Figures of these *Maculae* are of unequal Magnitude and Greatness, and most Irregular; which argues them to be Stars, or Planets moving about the Body of the Sun, as some of the Ancients have supposed; some of these are more durable and lasting than others, and those are conceived to be solid Parts of the Sun, appearing variously figured, and of different Magnitudes, by reason of the vertiginous Motion of the Sun about its Axis, representing them to our Sight differently.

ly situated; which diversity of their Appearance may arise from the Manner of the Sun's Circumigation, which is such, that its Axis does not always keep the same Inclination to the Plain of the Ecliptick.

4. The *Facule Solares*, or Lights in the Sun, are conceived to be fiery Globes, bursting out of the solar Mountains, shining amidst the cloudy Vapours; which by reason of innate Fervor of the Sun's Globe, boil up like Mountain Light, scattering and dispersing the darker Spots, and diffusing as it were a fiery Ocean of unusual Splendor. In the Face of the Sun, saith *Galileo*, there appear certain Marks brighter than the rest, in which is observed the same Motion as in the Spots, which that they are inherent in the very Body of the Sun, cannot be doubted, in regard it is not credible that there can be any other Substance besides brighter than that of the Sun. As to the distance of the Sun from the Earth, *Riccioli* saith, That the attaining to the Knowledge thereof is a Sublimity that hath hitherto exceeded the Subtility of all Astronomers. Yet Mr. *Whiston*, from the Principles of Sir *Isaac Newton*, from the Observations of Mr. *Flamsteed* calculates the mean Distance of the Sun from the Earth to be 81 Millions of Miles.

AN Observation of a *Macule* in *Sole*, by the famous Mr. *Hook*, from the Appearances and Disappearances of Solar Spots, he thinks the future State of the Weather may be predicted. During the great Heat of the Weather in 1676 I observed, saith he, a very conspicuous *Macula*, and its immediately encompassing *Nubecula*, and some other less conspicuous Spots at a further distance pass over the Face of the Sun, and found that it was nearest the Middle when the Heat was greatest, that the Heat increased as it came near the Middle, and decreased as it departed from it. It is worth observing for the future, if the like Weather do happen upon the next Appearance of the like *Macula*, since it is not very improbable to suppose that the Body of the Sun itself may be much hotter when such Eruptions appear. *Maculae* oftentimes ending in *Faculae*. Again, upon the 7th there appeared about six greater and smaller in one Knot, their proper *Nubeculae* or *Umpira's*, the Heat of the Sun again increased to a very great Degree, and abated as

grew towards the Limb, and grew fainter. This Hint may de-
 serve some farther Inquiry, for though probably it may not be
 able to predict the Appearance of those Spots, yet possibly
 the appearance of the Spots may serve to predict the future
 constitution of the Weather.

Of the Eclipses this present Year, 1729.

Here will be Five Eclipses within the Perimeter of
 this Year; Three Eclipses of the *Sun*, and Two
 of the *Moon*, the Solar Eclipses will be all of them in-
 visible to us, but those of the *Moon* will be visible and
 they fall in the following Order.

The First is of the *Sun* invisible, on *Saturday* the 18th
January, at 6 in the Morning.

The Second is a great and visible Eclipse of the *Moon*,
 on *Sunday* the 2d Day of *February* in the Evening, the
 beginning is about 58min. past 6 in the Evening, the
 Middle is 44min. after 8, and the End of the Eclipse is
 half an Hour after 10 at Night, it will continue totally
 eclipsed for the Space of 1 Hour 33min. and from the Be-
 ginning of the Eclipse to the End thereof will be more
 than 3 Hours and a half.

The third Eclipse is of the *Sun*, on *Sunday* the 16th
 of *February*, at 9 at Night, so invisible.

The Fourth is an other invisible Eclipse of the *Sun*, on
Monday the 15th Day of *July* at 2 in the Morning.

The Fifth and last is a great and visible Eclipse of the
Moon, on *Tuesday* the 29th of *July*, it begins on *Monday*
 Night at 33min. after 11 of the Clock, the Middle is
 on *Tuesday* Morning 20min. after 1, and the End of the
 Eclipse is 6min. after 3 in the Morning, the total Dura-
 tion is 3 Hours 33min.

The Effects of these Eclipses may be some of ill Consequence
 to *Italy* and the City of *Rome*, the 1st visible Eclipse fall-
 ing in *Leo*, and the other in *Aquarius* the opposite Sign,
 and in the 9th House, which is the House of Religion,
 and Animosities will be in Vogue amongst them,
 incited by their own Sons of Sedition; but it would
 be well if they would be of a more Christian Temper,
 as the common Enemy to *Europe* seems obstinate.

*Observations on the Four Quarters of the Year, at
first of the Winter.*

Which takes its Beginning on Tuesday the 10th Day of December, 1728. at about 56 Minutes past Noon when 2 degrees of *Taurus* ascend, and 13 Degrees of *Capricorn* culminate, *Saturn* is in the 11th House, *Jupiter* the 3d Retrograde, *Mars* and *Venus* in Conjunction in the 10th, *Mercury* near the Cusp of the 8th, the *Sun* in the 9th, and the *Moon* in the 5th, departing from the Opposition of *Saturn*, and applying to the Trine of the *Sun*; Positions at this Ingress are for the most part very favorable, and seems to import that in the Months of *January* and *February* this Year, the Actions and Affairs of the World will be moderately and quietly carried on for the most part; indeed there is an Opposition of *Jupiter* to the *Sun* from Cardinal Signs, which will occasion religious Differences and Disputes, and perhaps Popes may decline in the Affections of some great Man who formerly been a great Stickler for it. ' God will reform and purge his Church, and sayeth *Hieronymus* a Doctor can Fryer, before this be brought to pass, a great Scoth shall be brought on *Italy*; and that for the Depravation and Corruption of the Clergy, and the evil Government of corrupt Prelates, as will not themselves enter the Kingdom of Heaven, nor suffer those that would Thole Tribulation shall cry to the Almighty from Earth, and their Cries shall be heard.

Let all Division, all Contention, cease,

Let all your Strife be how your King to please;

Leave off your groundless and domestick Jars,

Which are more dang'rous far than foreign Wars,

For those would quickly have their wish'd for End

If these did not our Enemies defend.

Of the Spring Quarter.

Commenceth as the *Sun* enters the first Point of *Aries*, which will be this Year on *Sunday* the 9th Day of *March*, 42 Minutes after 2 in the Afternoon, at which time is 25 deg. of *Leo* ascending, and 13 deg. of *Taurus* declining, *Saturn* is in the 7th House, *Jupiter* in the 6th, *Mars*, *Sol* and *Mercury* in the 8th, and *Venus* is near the Cusp of the M. C. the *Moon* is near the Cusp of the 5th House departing from the Trine of *Mars*, *Sol* and *Mercury* at the last Ingress was an Opposition of the *Sun* and *Jupiter*, at this *Jupiter* is in Square to the *Sun*, *Mars* and *Mercury*. These Positions will set Things a little in a hurry, and a little more Time will bring great Matters to light; for the primary Planets are all at this Time above the Earth, which always reveals concealed Mysteries, and *Setellitium* in the 8th House (as at the Time of this Ingress) is oftentimes the Fore-runner of great Cruelties, War and Bloodshed. We are yet under the Influence of that famous Conjunction in *Dec.* 1722. and perhaps may feel more of the Effects of it this Year than in any one Year since that Time; for that the material Effects of that Congress would not be discovered till after some Years. I then told you from the Planets being then all hid under the Earth, nor from that Time to the Time of this Ingress have we had a Scheme so probable to reveal the Secrets of that great Conjunction as is the Scheme of this Ingress. The Debates and Differences now in the World will be mostly upon the Subject of Religion, and the good Designs of pious and holy Men, who endeavour to bring Things to a State of Tranquility, are often counterplotted by Men of Might and Malice, I see, sayeth *Amatus*, great Wars and Shedding of Blood: I say, he, Wars, the Fury whereof shall last long, Provinces divested of People, Kingdoms in Combustion, many strong Holds ruined, and Cities forsaken of their Inhabitants. There shall be nothing but Deceit among Men; thereupon shall ensue great Confusion among the Kingdoms of the World, a mercurial Prince shall by degrees obtain a Kingdom, he shall love Justice, and by his Means Religion

Religion and Law shall have an admirable Change. The Popish Crew in general have bore Sway in *Europe* a long Time, we have tasted of their Kindness and so hath *Italy* with a Witness; but the Time is coming when *Babylon* must down, and head the World no more: One of their own Cabal, viz Frier *Vincent* a Dominick tells us
 • That there shall be Three Armies that shall come from
 • the West, East and North, and fight together in *Italy*
 • and there shall be a new Reformation in the World
 And then he pronounces a Woe to his Brethren of the Romish Clergy.——*Spain* will meet with its Share of Misfortunes and Troubles this Year, I wish all may continue quiet in the North, and that the Christian Princes there of may meet with no Disturbance from the *Turks*.

Of the Summer Quarter.

Which takes its Beginning upon *Tuesday* 10th Day of *June* 48min. past 2 in the Afternoon, at which Time the Beginning of *Scorpio* ascends, and rodeg. of *Scorpio* culminates, here is a greater Satellitium of Planets in the 8th House than was found in the Scheme of the foregoing Quarter, and indeed the Positions and Aspects of this Quarter hath a great Affinity with that, and the Transactions of publick Affairs of this Quarter will so far chime with the Nature of the last, that I count it needless to make any Repetition, any farther than to take Notice that Retrograde *Saturnus* is in Square to *Mars* and *Venus* who are in Conjunction in the 8th House, not far from the opposite Degree of the great Conjunction in 1722. This will be eminently injurious to the Monarchy of *Spain* to *Portugal* and some Part of *Italy*. I hope this Position will have no ill Effects upon the City of *London*, to cause any contagious Distempers or the like; however it is the Duty of every good Christian to joyn sincerely with the holy Litany, and pray from Plague, Pestilence, and famine, from Battle, Murder and sudden Death, *Good Lord deliver us*.

Of the Autumnal Quarter.

Which takes its Beginning on *Friday* the 12th of *September*, about 11 min. after 4 in the Morning, at which Time 11 deg. of *Virgo* ascends, and 5 deg. of *Gemini* culminates, the Positions and Aspects of this Ingress promise Felicity to Mankind in general, and can we but unite at home, we need not fear the Attempts of any foreign Enemies: It was the Snake that the Countryman nourished in his own Bosom that first turn'd upon him.

A bare-fac'd *Papist* ever does protest
To cut your Throat in earnest, not in Jest:
But brainless *Jacks* are of a diff'rent Note,
They'll swear they meant no Harm, if they cut your Throat.

Great-Britain hopes now to flourish, her secret Enemies are now discover'd, and the worthy Patriots of their Country will be for ever renowned for their good Services. May every deserving Man meet with a Reward suitable to his Merit.

It is no uncommon Inquiry amongst many good People, What the *Papists* mean by *Purgatory*? Where is it situated? and the like. To which I might justly answer at once, It is a fictitious Place only, and invented by mercenary Popish Priests to gull their ignorant Auditors out of their Money and Senses, and situated no where but in their pernicious saddle Heads; I wish that every Protestant Family and well meaning Popish Family too in *England* and *Ireland* would read the Reverend *Dr. Cavin's Master-Key to Popery*, that Author being better qualified to expose the ridiculous Foppery of that apish Religion than any other, as being himself once a Secular Priest in the Church of *Rome*; but thro' the Grace of God is now a Minister in the Church of *England*, he, in his Discourse of *Purgatory*, says, I cannot give a real Account of *Purgatory*, but I will tell all I know of the Practices and Doctrine of the Romish Priests and Fryers, in Relation to that imaginary Place, which indeed must be of a vast Extent, if, as the Priests give out, there are as many Apartments in it, as Conditions and Ranks of People in the

the World, the Intenfeness of the Fire in *Purgatory* is calculated by them to be 8 deg. and that of Hell to be only 4 deg. hot. But there is a great Difference between these two Fires. The Fire of *Purgatory* (tho' more hot and consuming) is but for a Time, of which the Souls may be freed by Masses, but the Fire of Hell is for ever. Pope *Adrian* the 3d did confess, That there was no Mention of *Purgatory* in Scripture or in the Writings of the Holy Fathers; but notwithstanding this, the Council of *Trent* has settled the Doctrine of *Purgatory* without alledging any one Passage of the holy Scripture, and gave so much Liberty to Priests and Fryers by that they build in that fiery Palace, Apartments for Kings, Princes, Grandees, Noblemen, Merchants and Tradesmen for Ladies of Quality, for Gentlewomen and Tradesmen's Wives, and for poor common People: These are the 8 Apartments which answer to the 8 Degrees of intense Fire, and they make the People believe, that the Poor endure the least Degree, the 2d being greater is for Gentlewomen and Tradesmen's Wives, and so on to the 8th Degree, which being the hottest Place of all is reserved for Kings. By this wicked Doctrine they got gradually Masses from all Sorts and Conditions of People, in Proportion to their Greatness: For they say that Providence fore-seeing that the poor People could not afford the same Number of Masses that the Rich could, therefore were they placed in the Place of less Sufferings in *Purgatory*.

But it is a remarkable Thing, that many poor silly Tradesmen's Wives, desirous of Honour in the next World, do importune the Fryers, whether the Souls of their Relations can be removed from the 2d Apartment to the 3d, thinking by that tho' the 3d Degree of Fire is greater than the 2d, the Soul would be better pleased in the Company of Ladies of Quality, and the Fryers make such Women believe it can easily be done, if they give the same Price for a Mass the Ladies give. I knew, sayeth Mr. *Cavin*, a *Shoe maker's* Wife, ignorant, proud, and full of Punctilios of Honour, who went to a *Franciscan* Fryer, and told him that she desired to know whether her own Father's Soul was in *Purgatory* or not, and in what Apartment? The Fryer asked her, How many Masses could she spare for it? She said, Two. Then

th the Fryer, your Father's Soul is amongst the Beggars,
 which caused the poor Woman to cry, and desire the Fryer
 to put him (if possible) in the 4th Apartment, and she would
 pay him for it, and the Price being agreed on, he promised
 to do it the next Day, and ever since the Woman gives
 her Father was a rich Merchant: For it was revealed
 to her that his Soul is among the Merchants in *Purgatory*.
 Now, what can we say? but the *Pope* is chief Governor of
 these fiery Regions, and Priests and Fryers the Quarter-Mas-
 ters that billet the Souls according to their own Fancies, and
 have the Power, and give for Money the King's Apartments
 to the Soul of a *Shoe-maker*, and the Apartment of a Lady
 of Quality to the Soul of her *Washer-woman*.

Thus by such idle Tales which are intruded
 On ign'rant People, are their Minds deluded:
 In good old Days were no such shameless Lyers
 As idle Monks and addle-pated Fryers;
 Whereby the Papal Pow'r they do advance,
 In keeping People thus in Ignorance;
 But may they never more have here Intrusion,
 To pervert brave *English* Souls with their Delusion.
